GABRIEL FERREIRA UMBELINO

Senior Software Engineer at Upside (Dig Insights) | React | Vue | Angular | Node.js | SQL | Git
Curitiba, Paraná, Brazil

Summary

With more than ten years of experience in software development, I currently work as a Senior Software Engineer at Upside, where I apply my advanced skills in React and Node.js to create innovative solutions. My experience as a Tech Lead at Medprev reinforced my ability to lead technical teams and contribute to the continuous growth of the product.

Our team at Upside values effective communication and collaboration. With commitment, we face complex challenges, and I am proud to be part of a group that shares knowledge and constantly seeks excellence. The passion for technology and the search for continuous development are what drive me to achieve significant results for the company and our clients.

Experience

Dig Insights

Senior software engineer
November 2021 - Present (4 years 10 months)
Toronto, Ontário, Canadá

At Dig Insights, a SaaS market research platform, I work as a Front-end Specialist, responsible for creating and maintaining robust solutions using React.js. I develop dynamic and intuitive interfaces that enable accurate market analysis, enhancing user experience and supporting strategic, data-driven decision-making.

Medprev

9 months

Tech Lead

August 2021 - November 2021 (4 months)
Curitiba, Paraná, Brasil

As a Tech Lead at Medprev, I led initiatives to develop and restructure the system architecture using Vue.js, Node.js and SQL. This role involved coordinating technical efforts within the team and implementing solutions that enhanced performance and data management for medical applications.

Front end Developer

March 2021 - November 2021 (9 months)

Curitiba, Paraná, Brasil

At Medprev, I worked as a Front-end Developer, creating multiple projects for the medical sector. During this period, I built and maintained a Vue.js component library, which was adopted across several applications, ensuring consistency and development efficiency.

EPAM Systems

Front-end Engineer

January 2020 - February 2021 (1 year 2 months)

Katowice, Silesian District, Poland

Working as a front end engineer in a variety of projects, in my experience at Epam I used from Node.js, Angular to React.js.

Volvo Trucks

Front-end Consultant

July 2019 - January 2020 (7 months)

Curitiba e Região, Brasil

Most of the time working on the global diagnostic service platform.

Creation of micro services in NodeJs, with continuous integration and automated testing.
